Software Engineering Technology Advanced Diploma

January 2022 - Present

Centennial College, Toronto, ON

GPA: 4.0/4.5 (A)

- Projects focus on web development (HTML, CSS & JavaScript) database system (Oracle), object-oriented programming (C#, Java), team projects, Agile methodology and software development life cycle
- *Relevant courses:*

Advanced Database	Software Systems Design	Web Application Development
Java Programming	Unix/Linux OS	C# Programming

PROJECT WORKS

Weather Web with APIs

- Developed a web app that provides the current weather of user's current location and gives the option for the user to search for a city and the app would display the current weather.
- Used an API of geolocation for the location and openWeatherMap API for the weather info
- Tools used: HTML, CSS, Bootstrap, JavaScript, jQuery, Node.js and APIs.
- GitHub Repository: [Weather App](#) – Web Link: [Weather App](#)

Portfolio

- Created a webpage for my own portfolio, proving my knowledge for the web app concepts, with a friendly UI design for the user to understand each section and learn more about me.
 - Tools used: HTML, CSS, Bootstrap, JavaScript, and Node.js.
- GitHub Repository: [portfolio](#) - Web Link: [portfolio](#)

Clothing Store Database

- Led the team project to create an inventory database system of a clothing store
- Developed an ERM diagram, created tables, inserted data and created special select statements
- Tools used: Visio, SQL, and Oracle.
- GitHub Repository: [Clothing store project](#)

OTHER WORK EXPERIENCE
